Inauguration of Intellectual Property Rights Cell, at SKLTSHU Campus

Intellectual Property Rights Cell was inaugurated at SKLTSHU Campus on 8-9-2023. Intellectual Property Rights are legal rights to inventor(s). It provides legal restrictions for use of new developments without the permission of the holder of the rights of the invention(s). The IP may be stolen if the appropriate steps are not taken to protect it. IPR also provides an avenue for royalties or other fees to the inventor(s) for the use of the invention / technology. There are two broad categories of IPR : , industrial property covering IPRs such as patents, trademarks, geographical indications and industrial design; and copyright related rights covering artistic and literary works, performances, broadcasts plant breeders' rights etc.,

Our University has submitted proposals for Warangal Chapata Chilly for Geographical Indication and proposals for GI of Balanagar variety of Custard apple, Kollapur Mango are in progress. Accession numbers were obtained from NBPGR for the new clones of Jack fruit, tomato, bael.

Intellectual Property Rights (IPR) is important for higher education institutions, as it protects the Intellectual Property (IP) of stakeholders created through research and development. The scope of IPR has increased from just patents to all types of IPs such as copyright, GI, Trademark, Design, etc. to protect all forms of human creativity in every field.

The purpose of the IPR cell is to facilitate, encourage, promote and safeguard scientific inquiry, research pursuits and the academic freedom of its faculty, researchers and students. IPR cell conducts activities to provide a clear understanding of the rights and responsibilities of the faculty, staff and students to protect their IP's generated through research work.

The cell shall offers assistance by protecting student's interests by making them aware of: the rights over their Intellectual Property, patentability opinion, drafting patent specifications, preparing filing documents, filing application and prosecuting the filled application and providing advisory services on various IPR. It shall also facilitate the transfer of knowledge and technology from the university to industry and enhance the scope of their commercialization.
